(SATURDAY)**

**TIME : 11.00 AM - 1.00 PM**

**VENUE : LOUNGE 4, HALL 4,  
KL CONVENTION CENTRE**

Held Concurrently With:

**ENGINEER®**  
3RD ENGINEERING EXHIBITION &  
CONFERENCE 2024, MALAYSIA

18 - 21 SEPT 2024  
KL CONVENTION CENTRE, MALAYSIA

An Event of

**IEM**  
CONVENTION

Organised by:  
ESG Standard Taskforce,  
Stand. Comm. on Professional Practice (PPC)

## SHARING SESSION ON UNDERSTANDING ESG DISCLOSURE ACCORDING TO THE IEM SIMPLIFIED ESG DISCLOSURE GUIDELINES FOR BUILT ENVIRONMENT

**SPEAKER : Ir. Ts. Dr.  
Leong Kah Hon**

Ir Ts Dr Leong Kah Hon is an Associate Professor in the Department of Environmental Engineering, Faculty of Engineering and Green Technology at Universiti Tunku Abdul Rahman (UTAR) and a HRDF Accredited Trainer. He obtained his Doctor of Philosophy (Civil and Environmental Engineering) from Universiti Malaya and professional qualifications from the Board of Engineers Malaysia and Malaysia Board of Technologists. He practises his engineering in Singapore for three years before joining the education sector. His great contribution to the environment sustainability has awarded him the AAET Green Award 2021 (Malaysia). He has more than six years of experience in teaching. His effective and interactive training methods that emphasise hands-on approaches have earned him much recognition. He was also the recipient of UTAR Teaching Excellence Award in year 2021.

### Synopsis

The IEM Guideline on Simplified ESG Disclosure for the Built Environment focuses on the three critical pillars—Environmental, Social, and Governance (ESG)—that steer companies in the built environment industry toward sustainable and ethical operations. ESG within this context involves a set of strategies supported by a structured action plan and transparent communication regarding the outcomes. These strategies are pivotal in generating comprehensive reports that initiate the development of a sustainability strategy. This strategy enables companies in the built environment to set objectives, monitor progress, and address sustainability-related impacts and challenges.

This guideline provides companies with a clear process to align their operations with sustainability goals. It aids in identifying and addressing non-financial risks and opportunities that are integral to a company's daily activities. By adopting this approach, companies can gain a comprehensive view of sustainability and corporate responsibility, ensuring that they not only meet regulatory standards but also contribute positively to environmental preservation, social well-being, and ethical governance. This holistic approach is crucial for shaping the future of the built environment, making it more resilient, sustainable, and attuned to the needs of both society and the planet.
