WEBINAR ON: WHY AND HOW TO DETERMINE WHETHER TO INSTALL SEISMIC BRACING

Come and join us!!

When?

19 October 2024, Saturday

Time?

9.00 -11.00 am

Venue?

Zoom Online

BEM APPROVED CPD: 2

CPD REF. NO.: IEM24/HQ/436/T (W)

REGISTRATION FEES:

IEM Student Members	<input checked="" type="checkbox"/> FREE
IEM Members	<input checked="" type="checkbox"/> RM15
Non IEM Members	<input checked="" type="checkbox"/> RM70

SYNOPSIS

In recent times, we have experienced more natural disasters as earthquakes is one of them. The topic of seismic bracing has been discussed lately in APAC and many properties owners are looking to build resilience and ensure that their property can withstand an earth quake event and still keep their properties functioning.

In the past building structures are designed to withstand earthquake and it is the MEP services that are not braced that affect the resilience of the property. As non-structural services get damaged during an earthquake, the question why bracing was not considered in the first place.

The suggested approach to take is assess how critical is my facility and whether it can operate as per normal after an earthquake and next step is to look at the location of the facility. This will help determine the decision to install seismic bracing. Also the location in relation to the seismic zones will be another consideration.

WHO IS THE SPEAKER ?

Mr. Spencer Teng
Speaker

He joined ENRICO since 1998, now known as nVent Inc USA as the Regional Sales Manager for Asia. He has more than 20 years in M&E support systems. He has worked with renowned International consultants and contractors in numerous projects like Theatres By the Bay, Changi Airport Terminal 3 and 4 (Singapore), Okada and Solaire Casino (Philippines).

Since 2011, he has been actively involved with the introduction of seismic bracing throughout Asia and has been working closely with M&E consultants, insurance companies and property owners.

He hold Master Degree from Murdoch University Perth, Australia and is also the ex-President of the Murdoch University Alumni Singapore Chapter.
