Non-IEM Members: RM70

SYNOPSIS

People, Process, Technology: Building a People-Centric Environment that Learns and Grows Together Collectively explores strategies to foster a sustainable and inclusive world.

The webinar aligns with global goals, emphasizing that every achievement contributes to progress. You will be introduced to the True Wealth Hexagon, 5 Pillars of Sustainable Development, and the ABCDE framework for global achievement.

Through Social, Economic, and Environmental Development (S.E.E.D.) and the three dimensions of sustainability, we will highlight interconnected growth.

The Triple Bottom Line approach – balancing people, planet, and profit – underscores the path to long-term business sustainability.

This insightful guide offers practical technology tools to create environments where individuals, organizations, and communities shall flourish collectively.

BIODATA

Koh How Tze is an author, speaker, futurist, and strategic business & technology advisor to companies and governments. He advises organizations to improve their efficiency and performance strategically by using emerging technologies like Artificial Intelligence (AI), Blockchain, Computing, Big Data, etc., with underlying Ethical elements.

His clients include start-ups, Small and Medium Enterprises (SMEs), Multi-National Companies (MNCs), charitable organizations, and government agencies. Throughout his 25 years+ career path (since 1997), with numerous project implementation and system management, he understands the ICT systems and their implications across multiple disciplines.

An advocate for sustainable developments, he is committed to the movement of ABCDE The World, which is building an AI-driven, Blockchain-based Cognitive resource management system powered by Data, Ethically. Being one of the beneficiaries of open source software ideology, he is willing to share wholeheartedly whatever experience and expertise deemed suitable for the right audience. He firmly believes that the best way to predict the future is to create it, and the best way to formulate the future is to connect the dots forward, consciously and strategically.
